Summary

Software developer building an accounting system for property developer client using .NET and SQL Server, with hands-on experience in General Ledger, AR/AP, financial reporting, and role-based access control. Computer Science undergraduate focused on business systems that reducing manual work.

Education

Bina Nusantara University Kemanggisan, Jakarta Barat
Bachelor of Computer Science *July 2024 – Present*
GPA: 3.75 / 4.00

Project Experience

Freelance Software Developer May 2025 – Present
MSI (Media Sistem Integrasi) – Client Project *Jakarta, Indonesia*

Accounting System for Property Developer | .NET Razor Pages, C#, SQL Server *Pre-deployment*

- Developed an internal web application for a property developer client, translating operational workflows and client demo feedback into system features.
- Implemented General Ledger & financial reporting (P&L, Balance Sheet) with automated period-closing and strict double-entry bookkeeping.
- Built Accounts Receivable & Accounts Payable workflows with invoice tracking, aging reports, and transactional ledgers.
- Implemented parameterized T-SQL stored procedures, CTEs, and indexes for transactional CRUD operations, preventing SQL injection.
- Implemented role-based access control with permissions down to page-level actions.

HR & Attendance System | .NET MAUI Blazor Hybrid, .NET Core Web API *Early development*

- Extended the accounting system with HR and attendance modules, reusing its company management and access control.
- Implemented GPS and selfie-based attendance tracking in an internal mobile app.

Technical Skills

Languages: C#, SQL (T-SQL), JavaScript, HTML/CSS
Frameworks & Libraries: ASP.NET Core (Razor Pages & Web API), .NET MAUI (Blazor), ADO.NET
Developer Tools: Visual Studio 2022, SQL Server Management Studio, Git
